

Aqua Ventures offers both Private Scuba Classes and Group Scuba Classes.

If you would prefer to learn in a **Private Scuba Class** setting with family or a few friends, we can accommodate you. The in water portion would be at a pool you have access to and during anytime morning, day or night if the pool is lighted. This is ideal for a small group of 1 to 4 students especially if the pool is a normal, residential size pool. We typically need to arrange for 3 to 4 hours of class time and 8 to 9 hours of pool training. The pool time may vary based on your group's size and each person's experience level. This can be set up for 2 full days or 3 or 4 evenings. The 3 day group schedule below is a good mix of time and days and a popular schedule for private courses. However, we would be happy to discuss dates and times to meet your needs. We can also rent a pool at an additional charge and with more limited hours if you have a larger group or do not have a pool available to you.

If you would prefer to learn in a **Group Scuba Class** setting to meet new diving friends and reduce expenses, we can also accommodate you. We typically offer a few group classes throughout the year. Below are schedules of our group classes to give you an idea of when and how a group class is structured. If you are interested in a group class, but later in the year, let us know and we can update you when additional classes are scheduled.

Both Private and Group Open Water Training dives require 2 days and a minimum of 4 total dives to complete your certification as an Open Water Scuba Diver. These dives will evaluate the skills you learned in the pool, teach you additional skills like basic navigation and build on your experience under the water. The dives can be completed with an instructor at a travel destination as a Referral Student or with one of our instructors at a local dive site. Private open water dives can be arranged on a weekday to avoid crowds or on a weekend. Group open water dives are on either a Friday/Saturday to have better visibility and avoid a crowd or on a weekend if the group prefers. This typically involves 1 snorkel dive and 2 to 3 scuba dives on the first day and 1 or 2 more scuba dives on a slightly shorter second day. An optional, additional scuba dive on the last day is sometimes possible depending on various factors so you can gain additional underwater experience.

Our next Group Scuba Course starts on...

<u>Date</u>	<u>Time</u>	<u>Session</u>	<u>Instructor:</u>	<u>Location</u>
